

Instructions

iPhone:

This application is designed for **iPhone 5** and above. The reason that happened is because I couldn't test autolayout on an iPhone 4 because I didn't have a device and the initial screen is a camera view and won't work on the simulator.

To test the app I have attached some QR codes.

Use the following profile:

Username: kent

Password: eda

This account works on both platforms (iPhone and WebPage).

WebPage:

The link is: <http://jhp20.student.eda.kent.ac.uk/dist/index.html>

However as of yesterday the link is NOT WORKING even though it is uploaded on miggins (I talked with Ravi and he had the same problem).

Alternative 1:

- 1.Go to my miggins folder (jhp20)**
- 2.open the folder Hotel Management**
- 3. open the dist folder**
- 4. double-click index.html and run it locally**

Alternative 2:

- 1.Download the zip file from dropbox:**

<https://www.dropbox.com/s/djmjr6myurwu17l/HotelManagement.zip?dl=0>

- 2. unzip and follow the same process as above:**

- 3.Go to my miggins folder (jhp20)**
- 4.open the folder Hotel Management**
- 5. open the dist folder**
- 6. double-click index.html and run it locally**

if there is any problem with the webpage please let me know.
